Our story

Armac Martin is a luxury brass hardware company, dedicated to creating beautiful brass fixtures and fittings for over 90 years. We believe in exceptional design and exquisite detail; in celebrating true craftsmanship and in the art of using the finest materials to form products that truly stand the test of time.

Our heritage

Founded in 1929, we are now a fourth-generation family business with a reputation built on heritage and skill, thoughtfully passed down from generation to generation. We are proud to be a leading name in luxury brass cabinet hardware, favoured by architects, interior designers, property developers and customers the world over for almost a century.

Harold McGrail, 1985

Our material

Dating back to 1400 B.C, brass has a rich history with the application of the material used to protect and decorate through the ages in equal measure. The material is timeless, luxurious and above all, the beauty of brass lies in the vast array of finishes that can transform each product which is why we are fascinated with its many qualities.

Our craft

From initial design sketches to masterfully hand-finishing every single piece, we oversee each phase of production in the heart of England at our Birmingham factory. Our products can be found in some of the world's finest kitchens and interiors – something we'll never take for granted and that continues to drive our commitment to excellence.

Made in Birmingham, England

We've come a long way since the 1920s... with humble beginnings led by local brass founder Harold McGrail, our business, then simply known as Armac, focused on manufacturing reproduction furniture fittings with a small team of skilled craftsman. Harold's ambition ensured that Armac continued to evolve, even through the most challenging times including WWII, and almost a century later, it's this ambition and passion for the products that continues to drive our commitment to excellence.

Today, Armac Martin is made up of a dedicated team of over 100 members, each proudly bringing you the finest brass hardware to market, with every design and detail crafted for enduring style.

Our products can be found in some of the world's finest kitchens and interiors – something we'll never take for granted and so from initial sketches to masterfully hand-finishing every single piece, we oversee each phase of production in the heart of England, from the same Birmingham location where our story once began.

Bespoke

At Armac Martin, we understand that sometimes, you may require a piece or indeed a collection specially made for your interior design project and so we're proud to offer both full and partial bespoke design and manufacturing services for our luxury brass hardware.

With nearing a century of experience, let our skilled team impeccably transform your ideas into the perfect brass fixtures and fittings for when you simply need something one of a kind.

The details

We are delighted to invite each of our bespoke clients to visit us at our Birmingham factory where we can help to inspire your designs and you can experience the manufacturing process in person. Our bespoke service includes:

CAD – 3D rendering and technical drawings so you can clearly visualise your hardware

- 3D printing from our prompt prototyping machine to produce a resin prototype that you can see and feel to experience the design and proportions
- Laser engraving to subtly add your own branding on a wide array of bespoke products and our core collections
- Expert technical sales support so you have personal support throughout

Fully bespoke

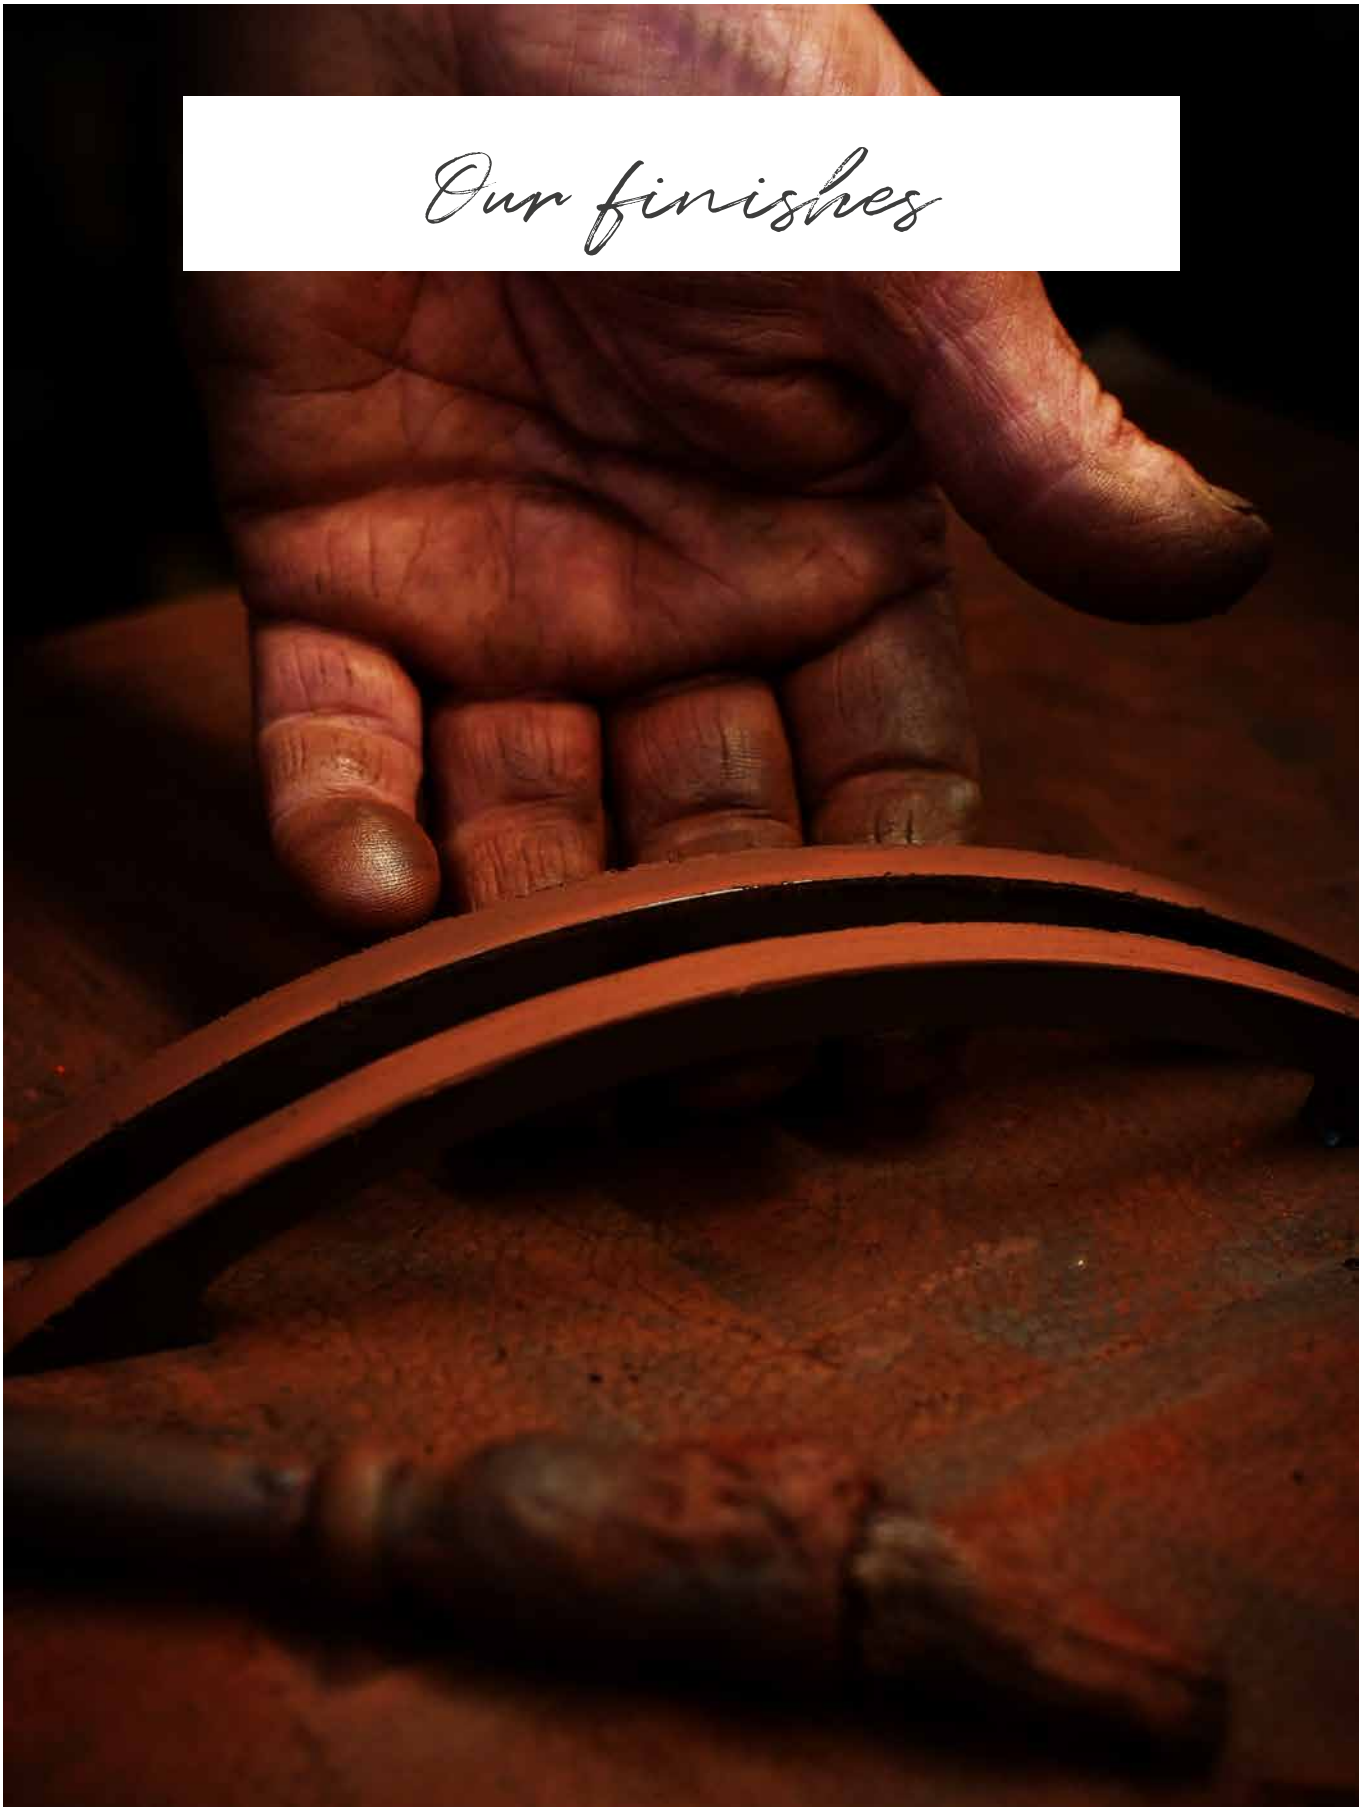
No matter what form your design ideas are in, work with our dedicated team to create a completely bespoke product. From size and style to branded engraving, we'll create 3D designs so you can experience how the finished hardware will look and feel to ensure it fits with your project, before creating final technical drawings for you to sign off before production begins.

Lead times are primarily between 8 - 12 weeks for this service.

Partially bespoke

Our partially bespoke service is perfect for when you've found the hardware pieces you need from one of our core collections, yet the measurements aren't quite right for your design. We can customise the length, diameter and projection for you so that the hardware fits perfectly for your project.

Lead times are primarily between 6 - 8 weeks for this service.



Our finishes

We truly believe that luxury is in the detail and so we take great pride in offering our customers over 20 beautiful signature brass finishes to ensure your hardware has the look and feel you desire. Each of our luxury cabinet hardware products is made from the finest solid brass and we apply an array of plated and patinated finishes to create an exquisite look for each - many of which are hand-finished by our team of expert polishers in the heart of Birmingham.

Our finishes

PBL - Polished brass lacquered

Hand-polished to achieve a smooth mirrored finish. Highly durable clear gloss lacquer is then applied and baked to ensure the lacquer cures.

Baking the lacquer ensures that a harder and more durable layer will protect the finish from day to day usage and oxidisation.

PBUL - Polished brass unlacquered

The product is hand polished to a smooth mirrored finish. As this is a natural living finish, the finish will naturally oxidise and patina over time.

To help maintain and preserve the finish it is recommended that you use a good quality metal polish as required.

SBL - Satin brass lacquered

The product is hand sateened to give a brushed satin finish. A highly durable clear gloss lacquer is then applied which is baked in our ovens to ensure the lacquer cures to offer lasting protection.

Baking the lacquer ensures that a harder and more durable layer will protect the finish from day to day usage and oxidisation.

SBUL - Satin brass unlacquered

The product is hand sateened to give a brushed satin finish. As this is a natural living finish, the finish will naturally oxidise and patina over time.

Our finishes

SBSL - Satin brass satin lacquered

The product is hand sateened to give a brushed satin finish. A highly durable clear satin lacquer is then applied which is baked in our ovens to ensure the lacquer cures to offer lasting protection.

Baking the lacquer ensures that a harder and more durable layer will protect the finish from day to day usage and oxidisation.

ABL - Antique brass lacquered

The product is hand polished to a smooth mirrored finish. An antique patina is then applied to the brass before being relieved back to give the antique finish.

Finally, a highly durable clear gloss lacquer is then applied which is baked in our ovens to ensure the lacquer cures to offer lasting protection. Baking the lacquer ensures that a harder and more durable layer will protect the finish from day to day usage and oxidisation.

ABUL - Antique brass unlacquered

The product is hand polished to a smooth mirrored finish. An antique patina is then applied to the brass before being relieved back to give the antique finish.

As this is a natural living finish the finish will naturally oxidise and patina over time. The more the product is handled the faster the finish will wear away, eventually leading to a more natural brass appearance.

BEL - Burnished brass

The product is hand sateened to give a brushed satin finish. A light antique patina is then applied to the brass before being placed into barrelling machines full of cones. This is in order to achieve a naturally aged appearance to the product.

Our finishes

SAS - Satin antique satin lacquered

The product is hand sateened to give a brushed satin finish. An antique patina is then applied to the brass before being relieved back to give the satin antique finish.

Finally, a highly durable clear satin lacquer is then applied which is baked in our ovens to ensure the lacquer cures to offer lasting protection. Baking the lacquer ensures that a harder and more durable layer will protect the finish from day to day usage and oxidisation.

SAL - Satin antique gloss lacquered

The product is hand sateened to give a brushed satin finish. An antique patina is then applied to the brass before being relieved back to give the satin antique finish.

Finally, highly durable clear gloss lacquer is then applied which is baked in our ovens to ensure the lacquer cures to offer lasting protection. Baking the lacquer ensures that a harder and more durable layer will protect the finish from day to day usage and oxidisation.

AMB - American bronze lacquered

The product is hand sateened to give a brushed satin finish. A bronzing powder is then evenly applied to the brass before being relieved to give a smooth consistent finish.

Finally, a highly durable clear gloss lacquer is then applied which is baked in our ovens to ensure the lacquer cures to offer lasting protection. Baking the lacquer ensures that a harder and more durable layer will protect the finish from day to day usage and oxidisation.

CBP - Chocolate bronze lacquered

The product is hand sateened to give a brushed satin finish. A bright copper plate is then applied. A bronzing powder is then evenly applied to the copper before being relieved to give a smooth consistent finish with a copper undertone through the bronze.

Finally, a highly durable clear satin lacquer is then applied which is baked in our ovens to ensure the lacquer cures to offer lasting protection. Baking the lacquer ensures that a harder and more durable layer will protect the finish from day to day usage and oxidisation.

Our finishes

MBL - Matt black lacquered

The product is hand sateened to give a brushed satin finish before it is shot blasted to give the metal the desired surface finish.

A highly durable matt black coloured lacquer is then applied which is baked in our ovens to ensure the lacquer cures to offer lasting protection. Baking the lacquer ensures that a harder and more durable layer will protect the finish from day to day usage and oxidisation.

PNP - Polished nickel plate

The product is hand polished to a smooth mirrored finish. A bright nickel plate is then applied.

Nickel finish is less durable than chrome and as a result, is classed as a living finish which will oxidise over time.

PCP - Polished chrome plate

The product is hand polished to a smooth mirrored finish. A bright nickel plate is then applied before a chromium plate is applied on top of the nickel.

Chromium plate provides a very durable and hard-wearing finish.

SNP - Satin nickel plate

The product is hand sateened to give a brushed satin finish. A dull nickel plate is then applied.

Nickel finish is less durable than chrome and as a result, is classed as a living finish which will oxidise over time.

Our finishes

SCP - Satin chrome plate

The product is hand sateened to give a brushed satin finish. A dull nickel plate is then applied before a chromium plate is applied on top of the nickel.

Chromium plate provides a very durable and hard-wearing finish.

NBP - Barrelled nickel plate

The product is hand sateened to give a brushed satin finish. The product is then lightly distressed. Finally, a dull nickel plate is applied to the product.

Nickel finish is less durable than chrome and as a result, is classed as a living finish which will oxidise over time.

HBN - Hand burnished nickel

The product is hand polished to a smooth mirrored finish. A bright nickel plate is then applied. The finisher then hand burnishes the product to achieve a natural looking aged appearance.

Nickel finish is less durable than chrome and as a result, is classed as a living finish which will oxidise over time.

ASP - Antique silver plate lacquered

The product is hand sateened to give a brushed satin finish. A silver plate is then applied before a bronzing powder is applied on top of the silver. The finisher then relieves the finish to give an antique silver finish.

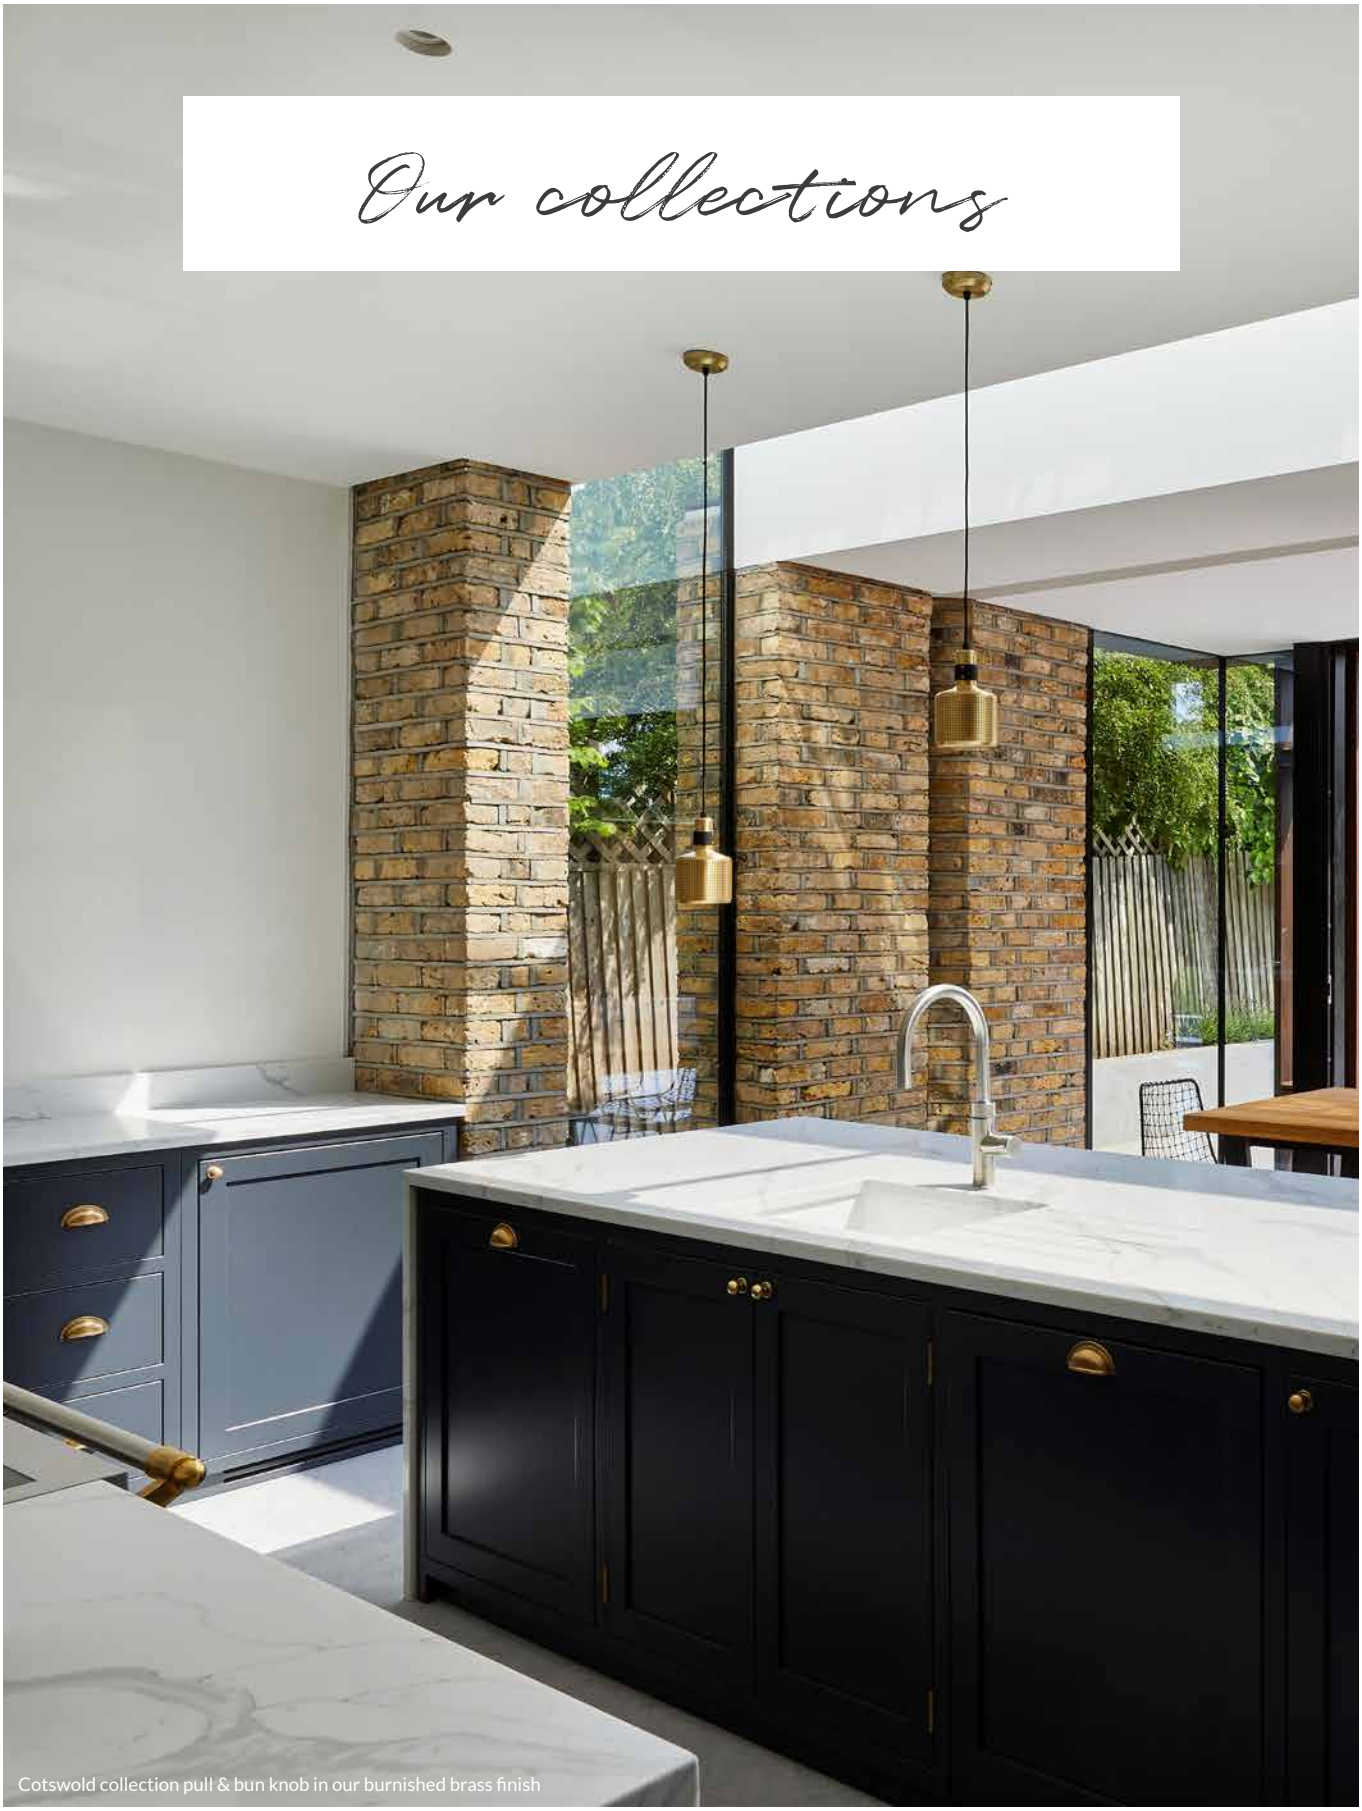
Finally, a highly durable clear satin lacquer is then applied which is baked in our ovens to ensure the lacquer cures to offer lasting protection. Baking the lacquer ensures that a harder and more durable layer will protect the finish from day to day usage and oxidisation.

ACP - Antique copper plate lacquered

The product is hand sateened to give a brushed satin finish. A copper plate is then applied on top of the copper. The polisher then relieves the finish to give an antique copper finish.

Finally, a highly durable clear satin lacquer is then applied which is baked in our ovens to ensure the lacquer cures to offer lasting protection. Baking the lacquer ensures that a harder and more durable layer will protect the finish from day to day usage and oxidisation.

Our collections



Cotswold collection pull & bun knob in our burnished brass finish

Designed to enhance your interior cabinetry and make every detail one to take note of, each of our luxury solid brass hardware collections is thoughtfully designed in-house. Producing the finest fixtures and fittings in an array of covetable styles, our collections promise to cater for every interior look imaginable. From minimal and modern to those inspired by times gone by like the art-deco era, discover over 35 exquisite collections to adorn your cabinets.

Crossways

Featuring stylish geometric shapes, Crossway is an exquisite collection of cabinet pulls, handles and knobs with a distinct art deco appeal. Designed and made in the heart of England, the Crossways collection of luxury brass hardware is an attractive option for both bedroom and living room furniture. Decorative and functional, the diverse ten-piece range ensures adding the final touches to your cabinets is effortless with over 20 finish options to choose from.

Our decorative grilles

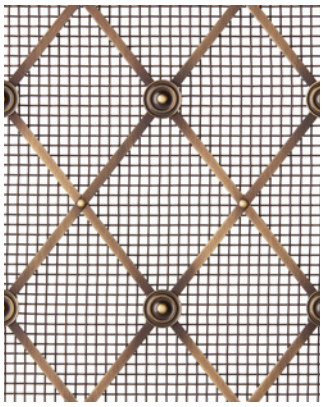
Regency Diamond grille in our satin brass finish with brass mesh backing

Handcrafted in the heart of England, our decorative grilles bring an ornate elegance to cabinets, panels, doors, vents or radiator covers. Assembled by hand and precisely trimmed to fit your required aperture, our solid brass grilles are designed to showcase a perfectly symmetrical pattern. No matter your decor, discover the perfect style to complement your design concept.

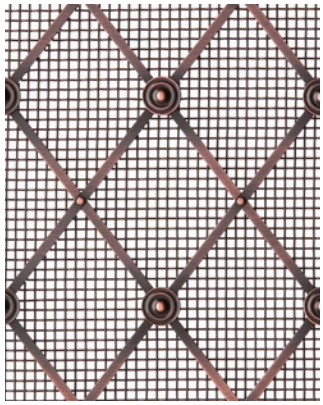
Grille finishes

Our expertly crafted luxury brass grilles come in ten beautiful finishes. These can be applied to all brass grilles, however are not suited to stainless steel or aluminium.

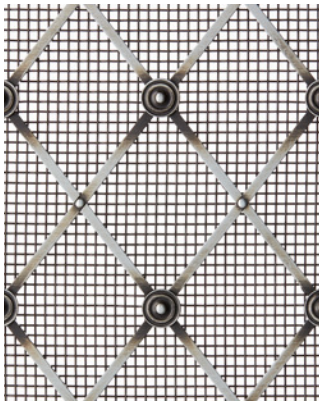
Please note, Antique Brass and Bronze Metal Antique finishes can vary slightly from order to order as these are hand-finished. Antique Brass, Antique Copper, Bronze Metal Antique and Antique Nickel are all lacquered and it is not an option to have the lacquer removed. Our Brass finish can be lacquered or unlacquered.



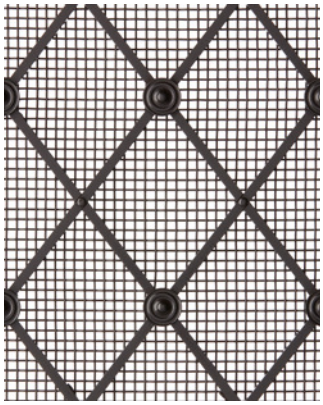
Antique Brass Lacquered



Antique Copper

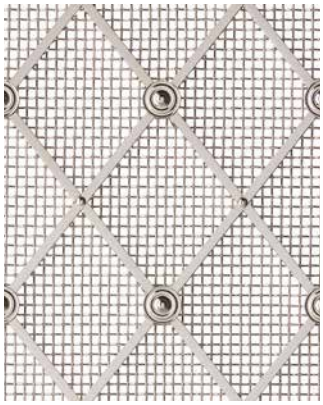


Antique Silver

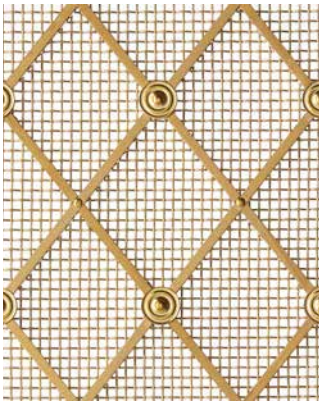


Bronzed Metal Antique

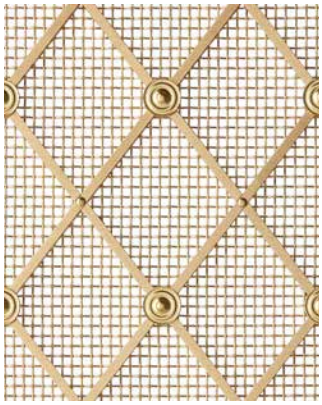
Polished Chrome



Polished Nickel



Satin Brass Lacquered



Satin Brass Un-Lacquered

Satin Chrome

Satin Nickel

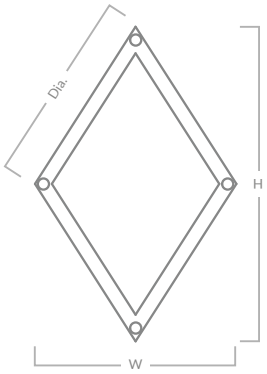
Maximum sizes for finishes, excluding Brass and Antique which can be larger, is 1829mm x 762mm

Regency Diamond grilles

Handcrafted in solid brass, our Regency Diamond Grilles add an elegant touch to interiors. Featuring a perfectly symmetrical pattern assembled by hand and trimmed to fit your required aperture, your grille will come ready to fit.

Diamond options

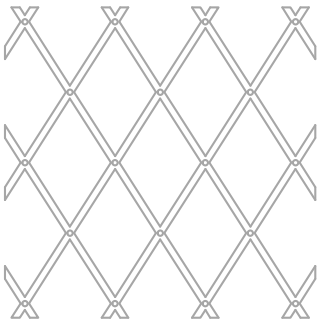
Available in three different diamond sizes, each made from a 3.2mm square section brass bar and fitted to hold with decorative pins.



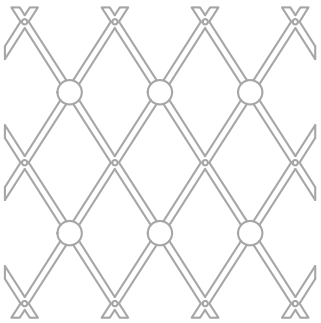
Code	Width (W)	Height (H)	Diagonal Dia. (Dia.)
G200	33mm 1-5/16"	44mm 1-11/16"	25mm 1"
G201	51mm 2"	64mm 2-1/2"	38mm 1-1/2"
G202	70mm 2-3/4"	89mm 3-1/2"	54mm 2-1/8"

Rosette options and formation

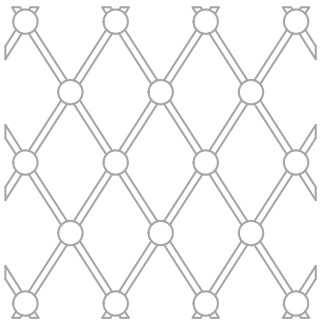
Available with the option of plain or floral rosettes on every crossover or alternating crossovers.
They can also be supplied without rosettes, showing the pinheads only. An additional option of a mixed finish is available on request for some grilles.



No rosette



Alternate rosette



All rosette

Plain

Floral

Mesh options

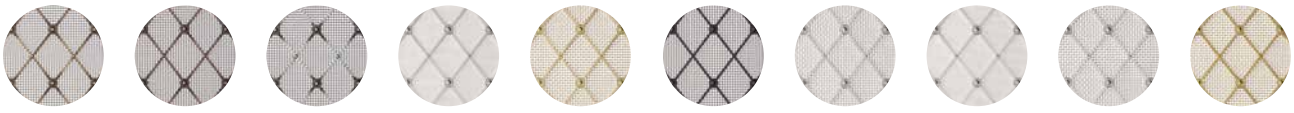
Available with a number of mesh options,
for more information, please see page 115.

Metal frame

Available with a metal frame,
for more information please see page 114.

Finish options

To see our ten grille finishes in full, please turn to page 95.



Please turn to page 116 for details on how to order your grille

Mixed finish

- Grilles without rosettes can only be satin brass and satin brass lacquered but with a backing mesh in any other finish
- Grilles with alternate rosettes can be mixed with two finishes (excluding BMA). The grille is one finish and the mesh and rosettes a different finish
- Grilles with Rosettes on all joins cannot be offered in a mixed finish

Cut pins

(The pins used to assemble the grills are clipped at the back and hammered over to create a cleaner look)

- They are only offered when grilles have no mesh backing mesh
- They cannot be offered on grilles with polished nickel, polished chrome or BMA

Please turn to page 116 for details on how to order your grille

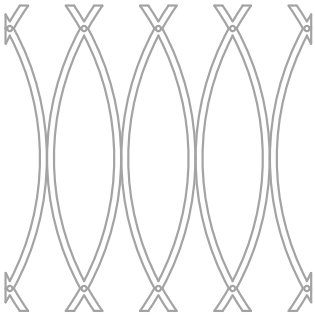
Elliptical grilles

Our Elliptical Pattern Grilles add a truly sophisticated look to cabinet doors, radiator covers and more. Handcrafted from solid brass and made to fit into your required aperture, they come ready to fit.

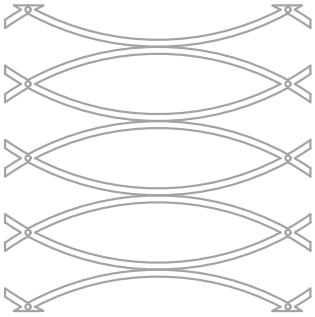
Orientation available

The ellipses will stretch to match either the height or width of your required measurements as indicated by the orientation below.

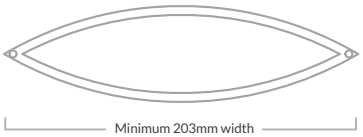
Please note, the longer measurement of your required panel needs to run in alignment with the stacked ellipses to achieve the desired look. For example, the height of the vertical grilles should be longer than the width.



Horizontal



Vertical



Rosette options and formation

Available with the option of plain or floral rosettes on every crossover. They can also be supplied without rosettes, showing the pinheads only.

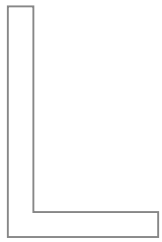
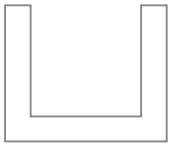
All the grilles featured in the catalogue can be supplied with an added metal frame.
We have four frame options, Angle, Channel, Flat and T section.

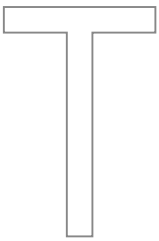


Angle Section

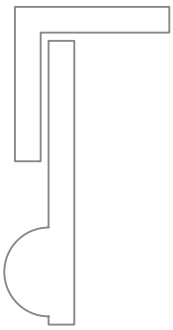


Channel Section

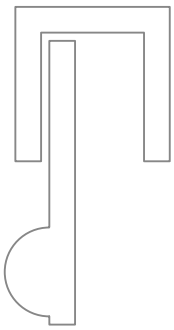
Flat Section



T Section

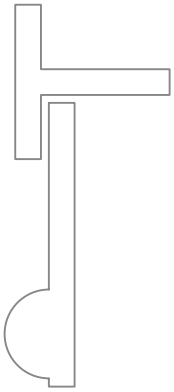


Angle Section
attached to grille (side view)



Channel Section
attached to grille (side view)

Flat Section
attached to grille (side view)



T Section
attached to grille (side view)

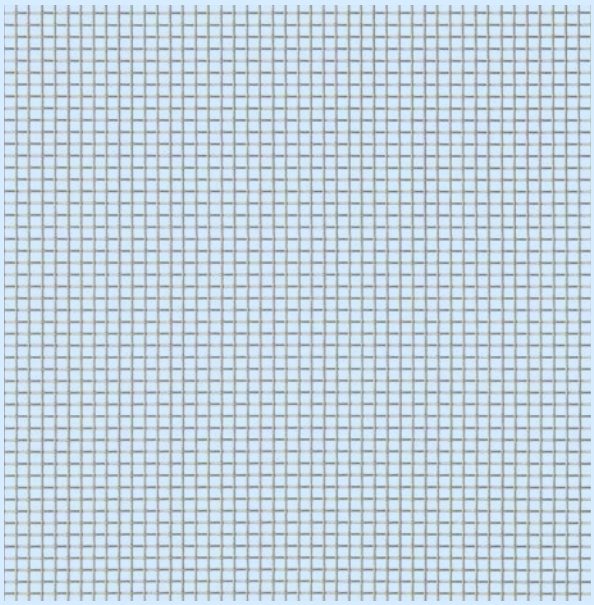
All can be supplied in either a 12.7mm, 19.1mm or 25.4mm face width

Frames are made from solid Brass 3.2mm thick section and can be finished to match the grille required

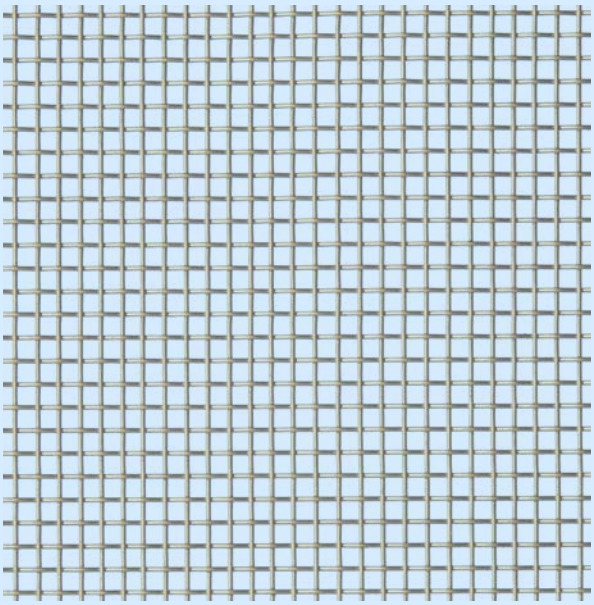
Screw holes can be added to the face of the frame for fixing if required

Mesh

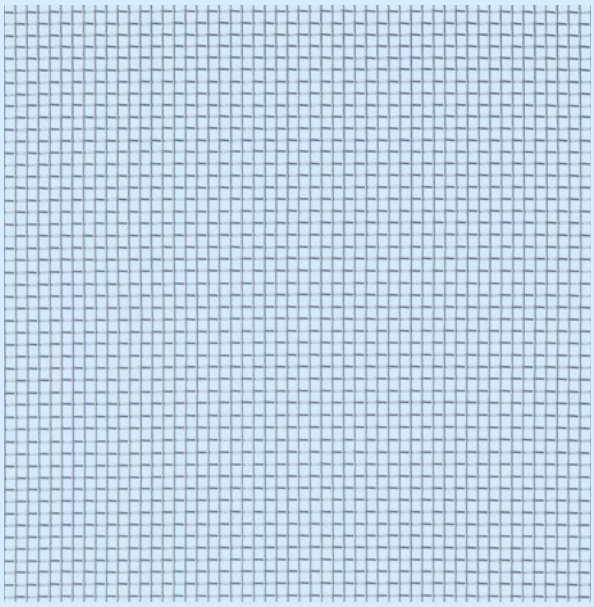
Our mesh is used with many of our other grilles as a backing but it can also be applied alone when something simple is required.



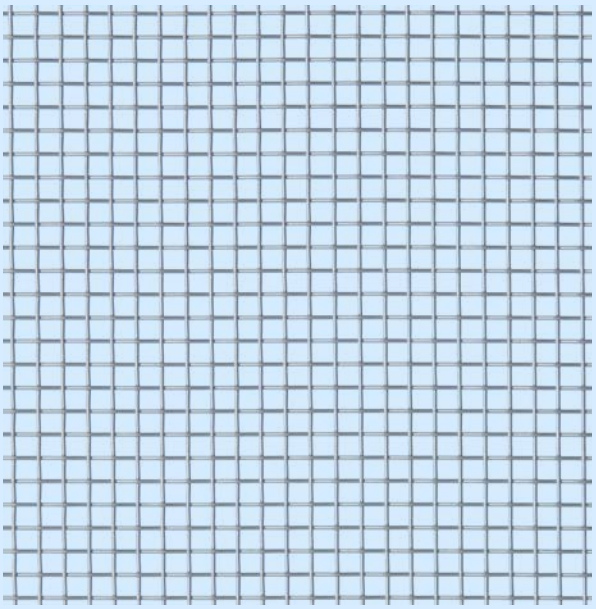
G213 – Fine Mesh Brass
Square Holes 1.6mm Internal



G214 –Fine Mesh Brass
Square Holes 3.2mm Internal



G213 –Fine Mesh Stainless Steel
Square Holes 1.6mm Internal



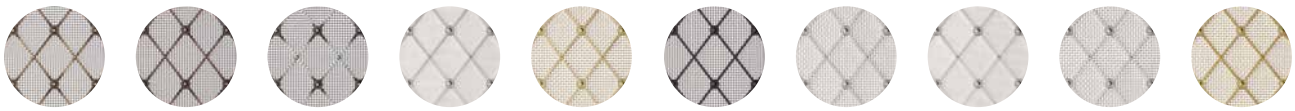
G214 – Open Mesh Stainless Steel
Square Holes 3.2mm Internal

Specifications

- Both available cut to size and also on a roll 1200mm high (approx. 4ft)
- Mesh is 1.6mm thick
- Both available in Brass and Stainless Steel
- Finishes available on Brass material only

Finish options

To see our ten grille finishes in full, please turn to page 95. Available only on our brass mesh.



How to order your grille

Required for all grilles

- Supply and identify the height and width of your panel. This should be the actual size you require, including the rebate of your door. Please allow 1.6mm all around to allow the grille to fit in your rebate comfortably
- Note the finish required
- Note if you require a metal frame

Additional details

Regency Diamond and Georgian Square

- Advise if backing mesh is required and specify G213 or G214 (see page 115)
- Advise if rosettes are required and if on every intersection or on alternate intersections
- Advise if you require roses, pinheads or both and the type of rosette required

Elliptical grilles

- Note which way you require the ellipses to run - horizontally or vertically (as pictured on page 98)
- Advise if backing mesh is required and specify G213 or G214 (see page 115)
- Advise if rosettes are required and if so which style

Interwoven grilles

- Note if you require a diamond or square pattern
- Note the aperture size required
- Note if you'd like plain or reeded section and the size required
- Advise if backing mesh is required and specify G213 or G214 (see page 115)

Frames

- Note the type and size of frame required
- Supply the aperture (hole size) or overall size (including frame)
- Advise if screw holes are required in the frame for fixing

Please send your order to sales@armacmartin.co.uk
